

PAM & IAM consultant with 2 years of Big 4 delivery experience across CyberArk (Self-Hosted and Privilege Cloud) and SailPoint IdentityIQ, delivering production SCIM integrations, SOAR connectivity, and PowerShell/Python automation for enterprise clients. Holds three CyberArk certifications including CDE PAM

TECHNICAL EXPERIENCE

PwC Acceleration Centers

Associate, Onsite (Promoted from Intern after 6 months)

Aug 2024 — Present

Bengaluru, KA

- Delivered end-to-end CyberArk PAM implementations for 8+ enterprise clients across on-prem (PVWA, CPM, PSM) and Privilege Cloud environments, covering account onboarding, safe configuration, platform policies, and compliance reporting
- Delivered CyberArk–SailPoint IdentityIQ SCIM integration across both Self-Hosted and Privilege Cloud environments, automating account lifecycle correlation between IGA provisioning workflows and PAM vault operations for a client engagement
- Configured and validated the CyberArk component of a Google SecOps SOAR integration for a client environment, testing REST API connectivity, session data retrieval, and automated response playbook triggers alongside the broader integration team
- Engineered reusable PowerShell, Python, and AutoIT automation workflows reducing manual PAM operations by 80+ hours/week across bulk safe creation, account onboarding, and exception reporting
- Developed custom CPM and PSM plugins extending CyberArk’s native platform to support non-standard target systems and client-specific credential rotation requirements
- Administered privileged account lifecycle in Active Directory, including security groups, service accounts, and gMSA objects across multi-domain environments; enforced endpoint privilege controls via EPM
- Authored client-facing RFPs, solution architecture diagrams, and integration build guides supporting pre-sales and delivery engagements across CyberArk and IAM projects
- Deployed CyberArk v15.2 in a High Availability cluster configuration in PwC’s internal lab environment, covering Vault, PVWA, CPM, PSM, HTML5, and PSMP components end-to-end
- Developing a Python-based CyberArk operational reporting tool (POC) to surface account audit, compliance, and session analytics via PVWA REST APIs

PwC Acceleration Centers

Intern, Onsite

Feb 2024 — Aug 2024

Bengaluru, KA

- Supported delivery of CyberArk PAM, EPM, and Privilege Cloud implementations across client engagement phases
- Developed Python and PowerShell scripts automating various account management processes
- Developed automations using Python and Powershell
